

ProCare 2600

Integrated Communication Solution

- Combines the key features and benefits of Dukane's ProCare 2000 and ProCare 6000 Systems
- Offers ProCare 2000 users an easy upgrade path to full ProCare 6000 functionality
- ProCare 6000 users can add economical system functionality in ancillary areas
- Delivers a standardized ProCare system platform for an entire facility to share

ProCare 2600

The ProCare 2600 Solution is just that, a communication system *solution*. It delivers the combined features and benefits of Dukane's two most advanced and popular systems, the ProCare 2000 and ProCare 6000.

Through an ingenious but simple interface, ProCare 2000 and ProCare 6000 Systems can now intercommunicate. Calls placed from an economical ProCare 2000 call-cord patient station can now annunciate on a ProCare 6000 touchscreen master station display.

Using the ProCare 2600 Solution, flexible interfaces with wireless telephones and pocket pagers are greatly

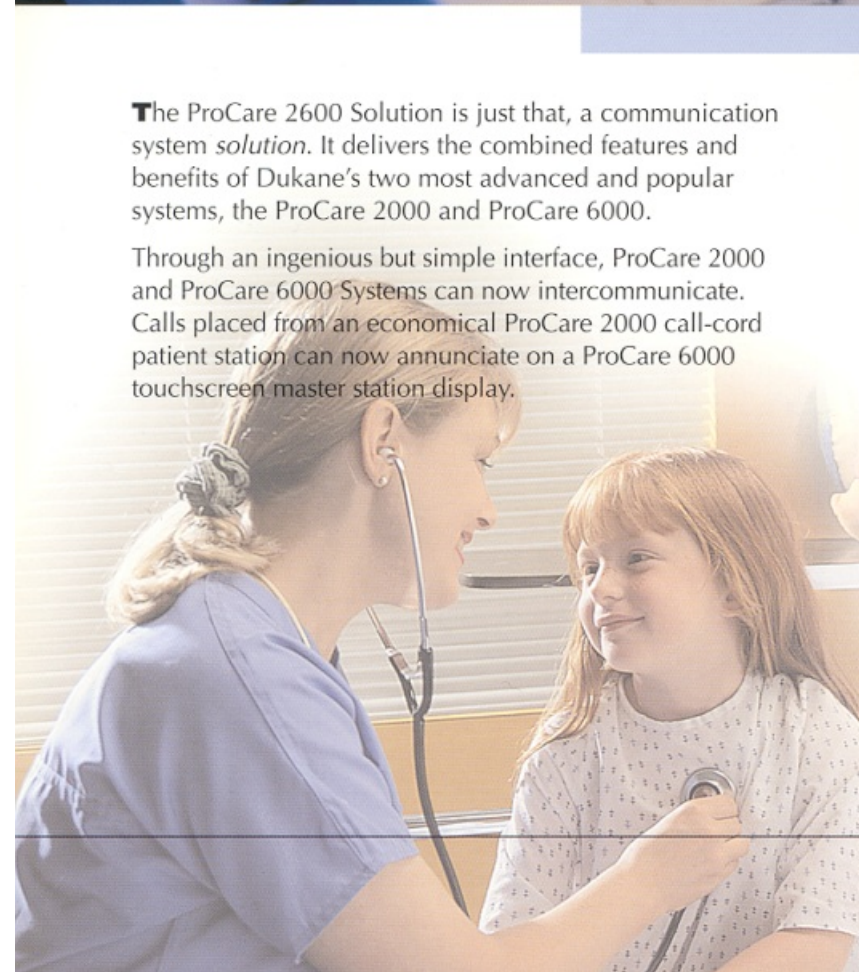

enhanced. These tools are modular and allow facilities to implement just what's required to help them meet their goals.

The ProCare 2600 is the latest example of Dukane's ongoing commitment to develop new and unique communication capabilities for today's healthcare facilities. And, taking advantage of Dukane's 50+ years of experience, you can rest assured that you are implementing technologies that will serve your facility well into the next millennium.

The 2600 Solution offers ProCare 2000 users unrivaled expansion and enhancements. It also offers ProCare 6000 users the ability to share their existing platform across multiple departments that may not require all of the ProCare 6000's functionality.

Your choices are many but the answer is simple. The ProCare 2600 Solution delivers the features and value that our healthcare customers are demanding.

DUKANE

ProCare 2600

Integrated Communication Solution

Features

- The ProCare 2600 Solution offers unrivaled flexibility by matching specific system features with a facility's communication requirements
- Modular integration with wireless telephones, infrared location (6000), pocket paging, and ARMS Activity Reporting make ProCare 2600 extremely versatile, flexible and cost-effective
- Implement only the features that are required, have the ability to add new capabilities as requirements change
- Existing ProCare 2000 users can easily expand systems and enhance features using the 2600 Solution
- Facilities using the ProCare 6000 can equip selected areas with economical ProCare 2000 stations
- Intuitive Windows® screens make it easy to manage assignments of wireless phones and pagers to route patient calls to their designated caregivers
- System standardization, by sharing a ProCare platform throughout a facility, greatly reduces technical support and in-service training

Single Call Cord Station

Dual Pillow Speaker Station

Code Blue Station
