DUKANE

OPEN ARCHITECTURAL INTERFACE (OAI)

Features

- *Permits System Integration with Third Party Systems/ Equipment*

- *Interfaces Via RS-232 Port*

Modular Software

General Description

The Dukane Model 437-00185 Open Architectural Interface (OAI) allows the integration of the communication system with other systems/equipment through two-way data transmission via an RS-232 connection. This connection resides on the required Model 110-3763 CPC2 Central Processor Card.

Communication is accomplished using OAI protocol and converting OAI messages to OAI packets. System integrators that use any operating system that sends and receives binary data can write interfacing software.
