

Sescom SES-3PAD-STEREO

2 Channel Stereo Mic Pad with 0dB/-30dB/-60dB Adjustable Attenuation

DESCRIPTION:

The Sescom SES-3PAD-STEREO, also known as the WuPad, is a 2-channel balanced audio attenuator equipped with two Neutrik XLR male and two Neutrik XLR female connectors, and two three-position selectable switches for fast and precise attenuation adjustments of 0dB, -30dB, and -60dB of each channel independently. Through proper utilization the SES-3PAD-STEREO can help eliminate distortion and overloading peaks when recording loud noises, and provide a full-bandwidth level cut to your signal. The SES-3PAD-STEREO uses a rugged metal housing that is equipped with a durable metal clip, which makes this ideal for use in the field or live events.

FEATURES:

- 3 precision attenuation positions: 0dB, -30dB, & -60dB
- Two Low-profile 3-position rocker switches to easily and quickly adjust attenuation
- 2 channels support Mono or Stereo operation
- Equipped with Neutrik male and female XLR connectors
- Durable clip for field recorder bag or belt
- Rugged metal housing
- Stops overloading peaks and distortion - provides flat, full-bandwidth across-the-board level cut; attenuates the signal to the level you need
