

Meeting 360

Experience More
Immersive and
Collaborative Meetings

Meeting 360 is a lightweight, compact, 3-in-1 video conferencing device designed to enhance your hybrid meetings. With dual panoramic cameras providing 360-degree views, high-quality microphones and speakers, and customizable screen layout options, Meeting 360 ensures all attendees feel engaged and connected.

Key Benefits

- **See Everyone Clearly**
High-resolution 360-degree view and Active Speaker Focus make virtual guests feel as if they're in the meeting room
- **Hear Every Idea**
Capture every speaker in the meeting with high-performance, omnidirectional speakers and microphones, able to detect voices from up to 20 feet
- **Choose Your Meeting Experience**
Effortlessly switch between screen layouts with the touch of a button for a customized meeting experience
- **Versatile, User-Friendly Design**
A plug-and-play design you can take anywhere. Simply connect one USB-C cable to a laptop and start your meeting
- **Always Know Who's Speaking**
Advanced active speaker focus seamlessly captures the active speaker's voice and image at all times
